Project Document:

Protocol Document Title: Alberta Offset System

**Quantification Protocol for Wind Powered Electricity
Generation**

Project Documentation Date: 23 February 2010

Project:

Project Name: Soderglen Windfarm Project

Project Description: Nexen Inc. and Transalta Corporation own 50% respectively of the Soderglen Wind Powered Electricity Generation project. Transalta Corporation is the operator. The plant includes 47 wind turbines of 1.5 MWe capacity for a total of 70.5 MWe.

The project was commissioned in September, 2006.

The opportunity for generating carbon offsets from this Project arises from the quantification of reductions in greenhouse gas (GHG) emissions resulting from the generation of electricity by wind, thus offsetting the generation of this electricity by fossil fuel sources.

Project Location: The Soderglen Wind project is located in Southern Alberta, near Pincher Creek.

Emission Reduction Credits:

ERC Creation Period: January 01, 2008 to December 31, 2008

Emission Type: tonnes of CO₂e

Quantity: 165,770 tonnes CO₂e for year 2008

I am a duly authorized corporate officer of the Proponent mentioned above and have personally examined and am familiar with the information submitted in this Assertion Statement, the accompanying Project Document on which it is based. Based upon reasonable investigation, including my inquiry of those individuals responsible for obtaining the information, I hereby warrant that the submitted information is true, accurate and complete to the best of my knowledge and belief, and that all matters affecting the validity of the emission reduction claim or the protocol upon which it is based have been fully disclosed. I understand that any false statement made in the submitted information may result in de-registration of credits and may be punishable as a criminal offence in accordance with provincial or federal statutes.
